Often their policies don't help to differentiate them or help identify their political values. Whereas their preferences do.

Below and over the page shows the preferences for each team as you read down the column for the team. Which teams are placed near last (Nos 15 -17) and by whom?

The table from top to bottom and left to right is the order on the ballot paper.

Please note that most teams decide the order of their preferences by the other teams, whereas some teams decide the order of their preferences by the individuals in different teams. In the later case, the number in the table indicates the first time a candidate from a team is listed as a preference.
