## **Submission to Future Melbourne Committee**

Meeting 90 held on 20 September 2016, 5.30pm

Council Meeting Room, Level 2, Town Hall Administration Building

### **Agenda Item 6.1, Ministerial Referral: TPM-2015-37 71 to 87 City Road, Southbank**

Southbank Residents Association is writing to object to the development proposed for 71-87 City Road in Agenda Item 6.1 of the FMC Meeting scheduled for 20 September 2016. This \$200 million development involves the demolition of 4 existing properties: heritage building at 71-75 City Road, 77-79 City Road, 81-83 City Road and 85-87 City Road.

#### **Exceeds height restrictions**

Our first objection to this development is that at 165.99 metres, the height is still above the discretionary maximum height limit of 100 meters (which applies under DDO60), despite previous revisions. Furthermore, the development proposes a height 50% greater than the preferred maximum building height for the area. If this development goes ahead, it will have an overbearing impact on the public realm of both City Road and Fawkner Street and will dominate the area.

#### **Overshadows Southbank Boulevard**

Our second objection is that the proposed development will overshadow Southbank Boulevard, which has already been identified in the City of Melbourne Transform Southbank Boulevard & Dodds Street Project to give residents and visitors more public open space. To permit a development of this size to overshadow areas clearly identified in the project is counter-productive and not in the best interests of residents.

Southbank is the most densely populated suburb in Melbourne with only 2.5sqm of public open space per person, compared with the Melbourne Open Space Strategy's recommendation of 20sqm per person. The Southbank Boulevard linear park development is the opportunity to give back to residents in this area, but to throw it away by approving this development would be a significant loss to the community.

#### **Insufficient setbacks**

This development does not meet the 10m minimum set out in DDO60 for setbacks and offers only half that at 5m. This will have a negative impact on residents' amenity and this development should be made to comply with the guidelines.

#### **Wind**

It is our understanding that this proposal fails to meet the wind conditions on the City Road side of the development, another reason to decline the proposal.

**Conclusion**

It is hoped Councillors will reach the same conclusion we have and concur with the findings of the Planning Officer.

This proposal should be refused due to its excessive height, insufficient setbacks and overshadowing of Southbank Boulevard.

Regards,
